Upload Your Video

Please follow these rules:

1. Upload only videos you created yourself. [+ More](#)
2. Certain types of content are not allowed on Vimeo. [+ More](#)
3. Commercial and business videos can only be uploaded with Vimeo PRO.. [+ More](#)

Still have questions? Read the full [Vimeo Guidelines](#).

Files:

 untitled.mp4

404.71MB

1 file / 404.71MB

+ Add another video to upload

[↑ Upload Selected Videos](#)

Other ways to upload:

Dropbox

Upload to Vimeo directly from your Dropbox.

FTP **NEW!**

Add videos using your favorite FTP client.

Mobile apps

Watch, shoot, edit, and upload from your phone.

Desktop apps

Upload to Vimeo from apps on your computer.

YOUR USAGE

Storage / 0B of 5GB used

Your weekly limit will reset on *Sun 7/1*

TIPS FOR GREAT VID

• Enhancer

Easily add music and looks to your videos on Vimeo — no editing software required.

• Compression Guidelines

We'll help you make sense of format, data rates, and resolutions so you can upload through the technical stuff and upload successfully.

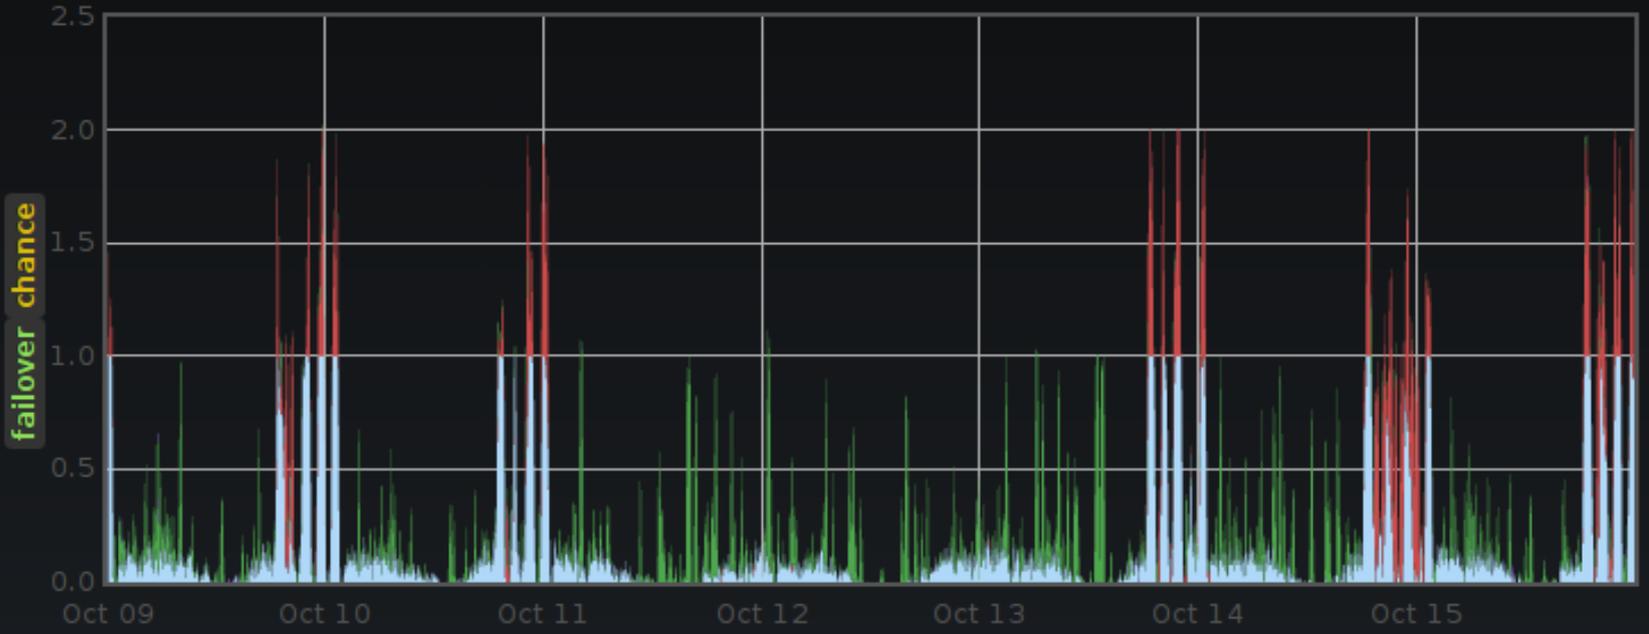

• Vimeo Video School

Learn how to make better videos at our one-stop shop that's home to less than 100 staff and video tutorials made by our community.

Understanding metrics

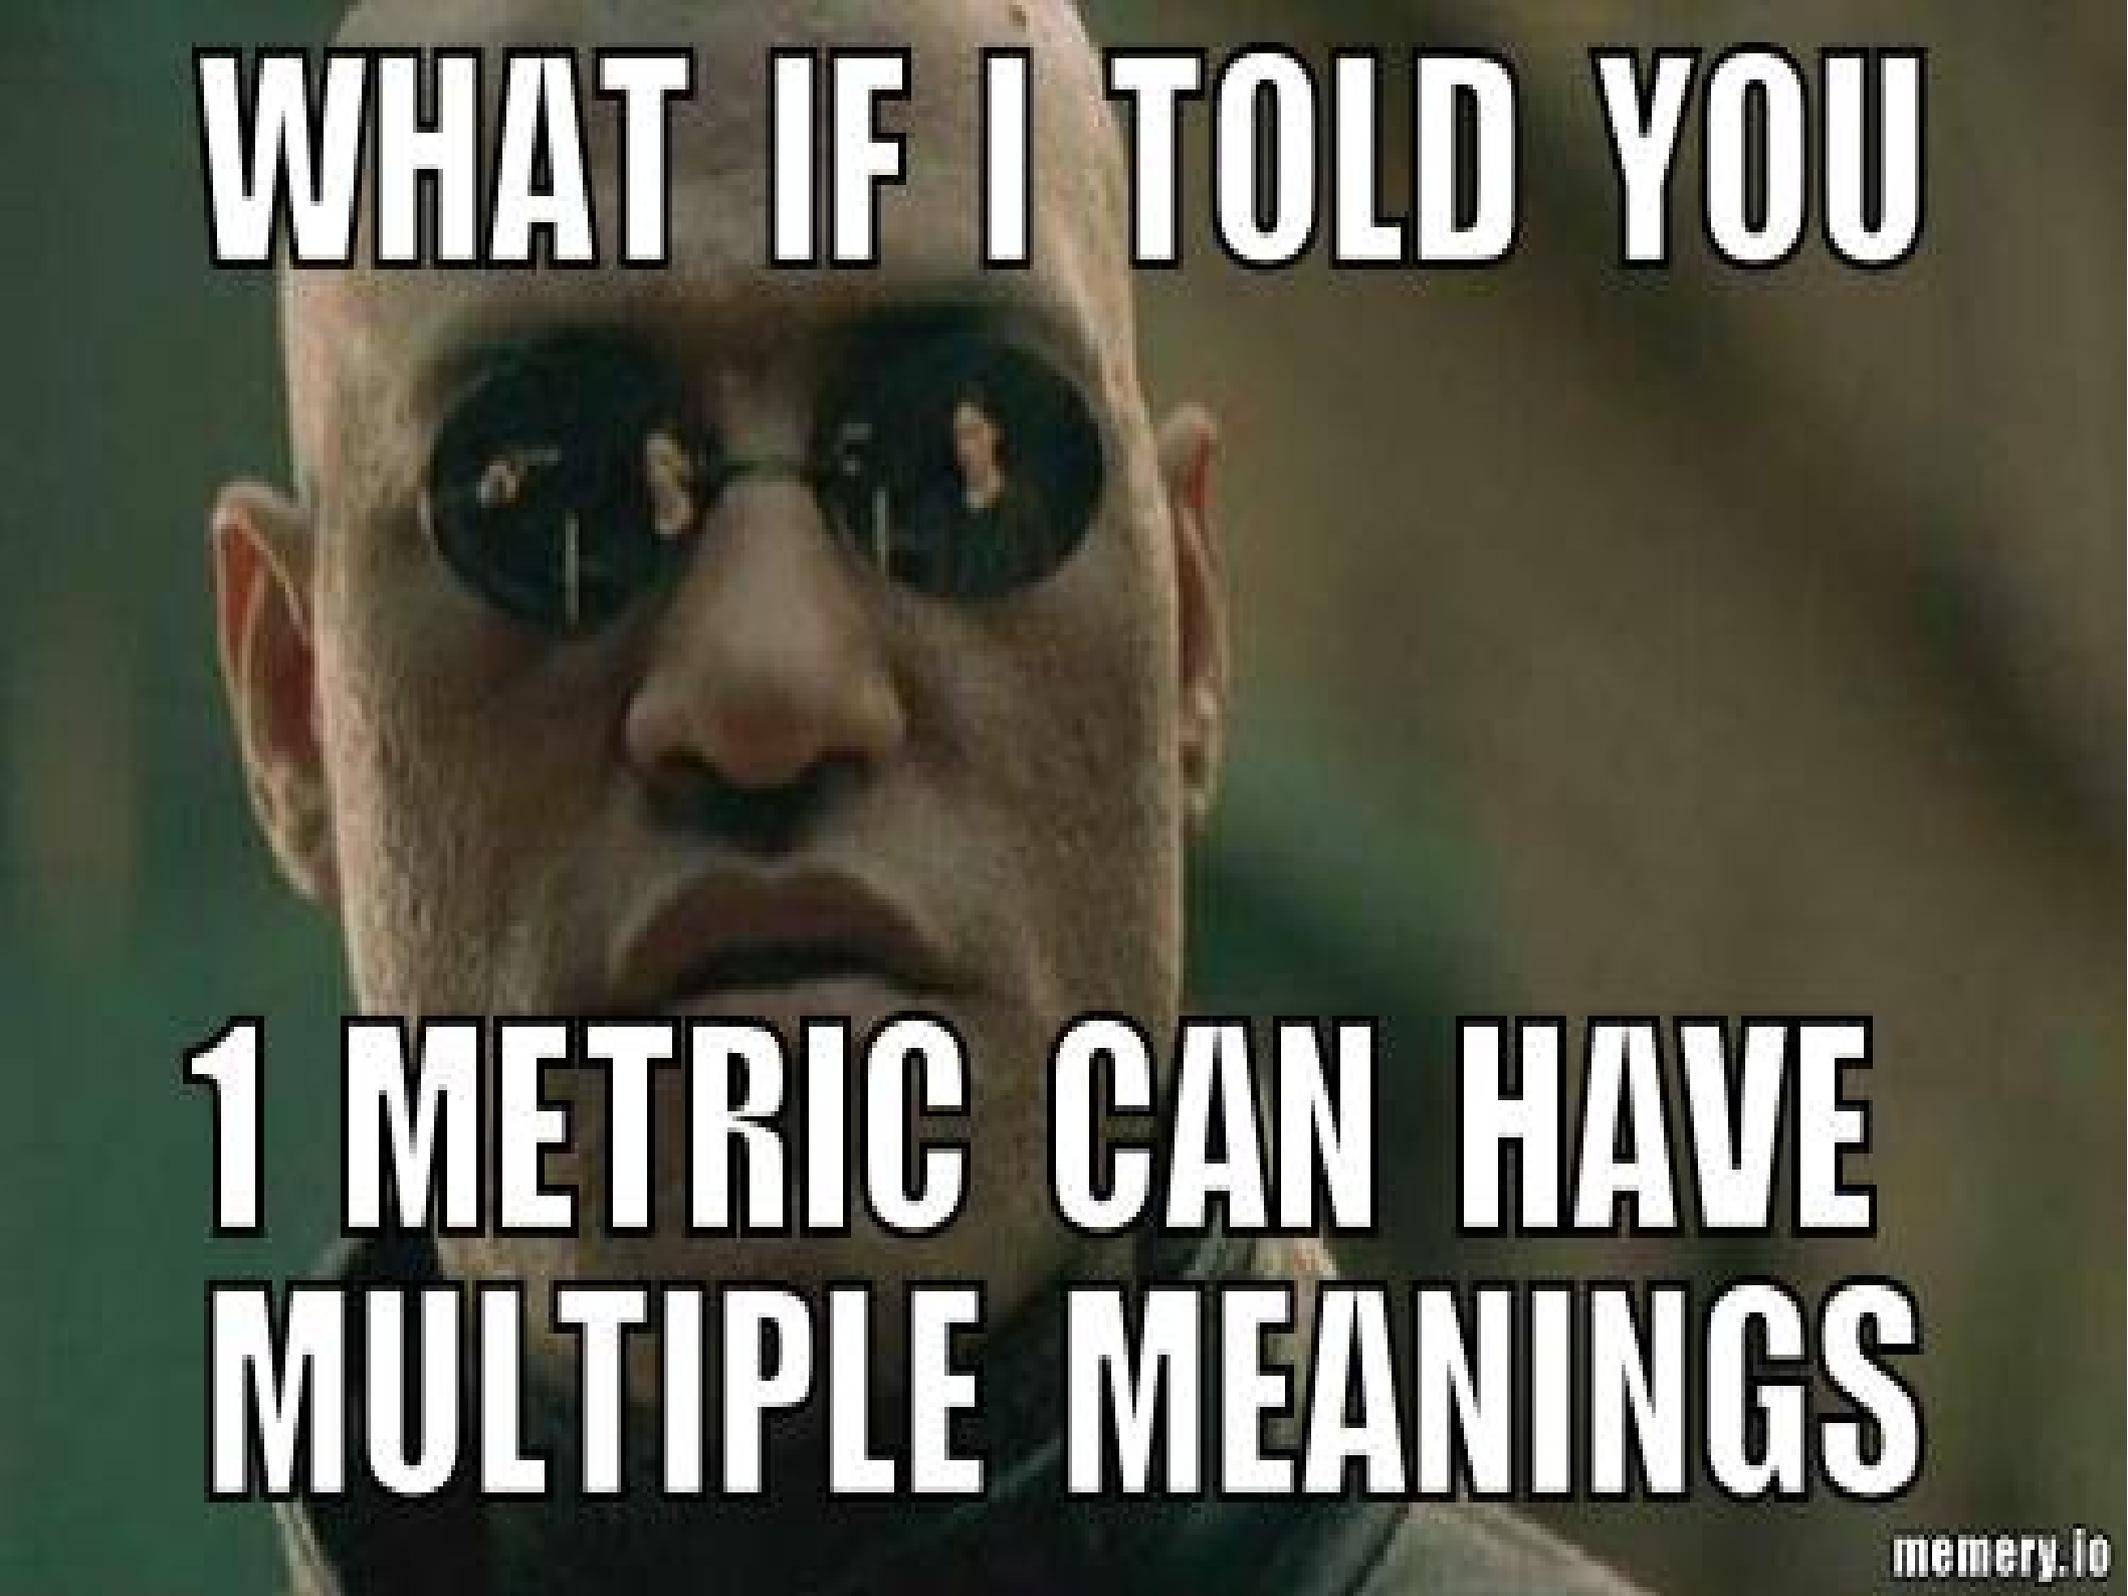

Terminology? Meaning?

Prefix?

Unit?

Aggregation?

Source?

WHAT IF I TOLD YOU

**1 METRIC CAN HAVE
MULTIPLE MEANINGS**

**Unclear, inconsistent
terminology, format
tightly coupled
lack information**

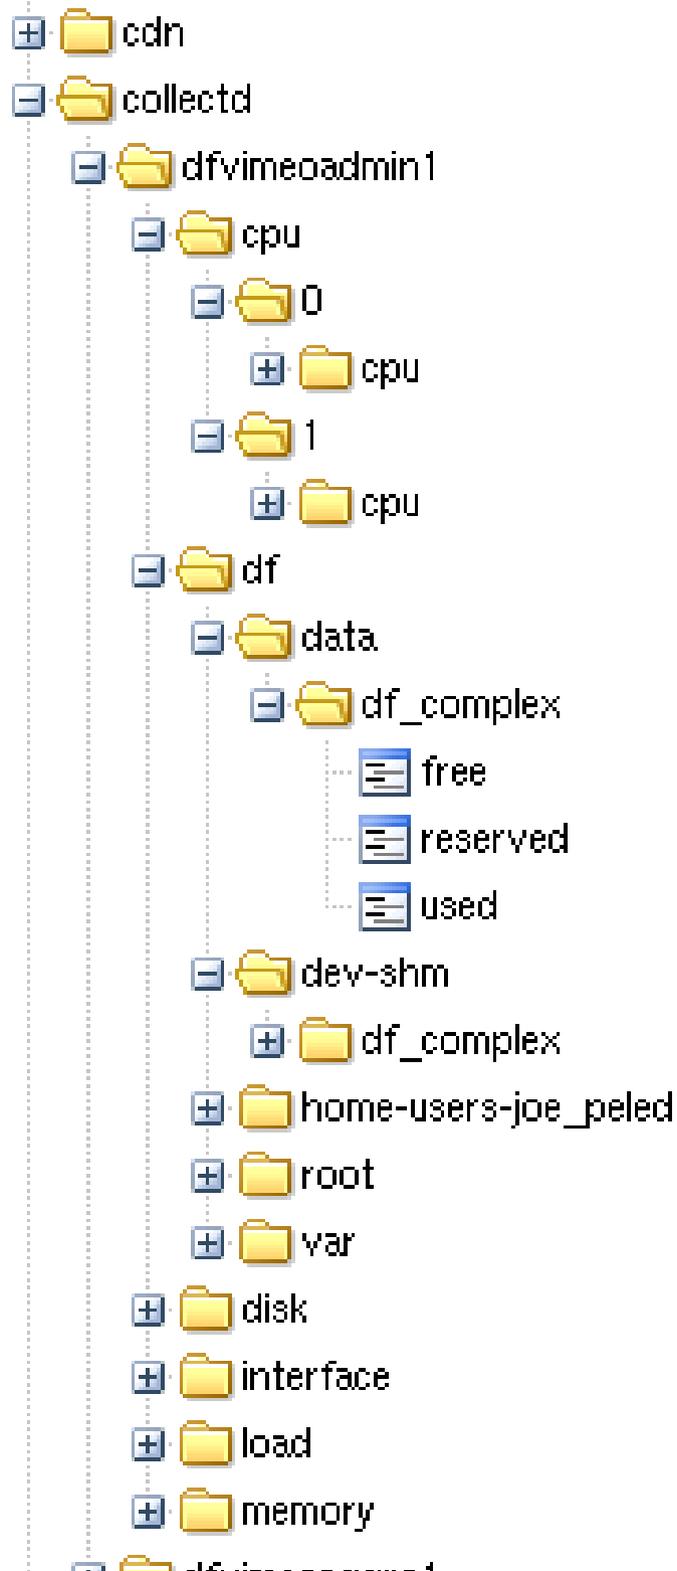

$$O(S * P * A * C)$$

S = # Sources

P = # People

A = # Aggregators

C = #Complexity

Graphs and
dashboards are a
huge **time sink.**

Q & A

Bonus round

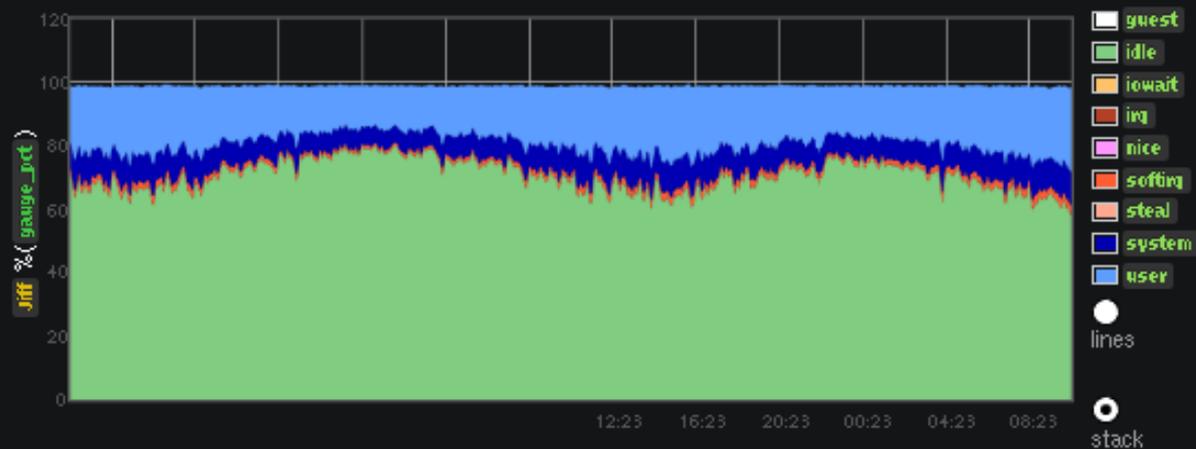

Dashboard definition

```
queries = [  
    'cpu usage sum by core',  
    'mem unit=B !total group by type:swap',  
    'stack network unit=Mb/s',  
    'unit=B (free|used) group by =mountpoint'  
]
```

Apply to all: `server=dfvimeostatsd1 avg over`

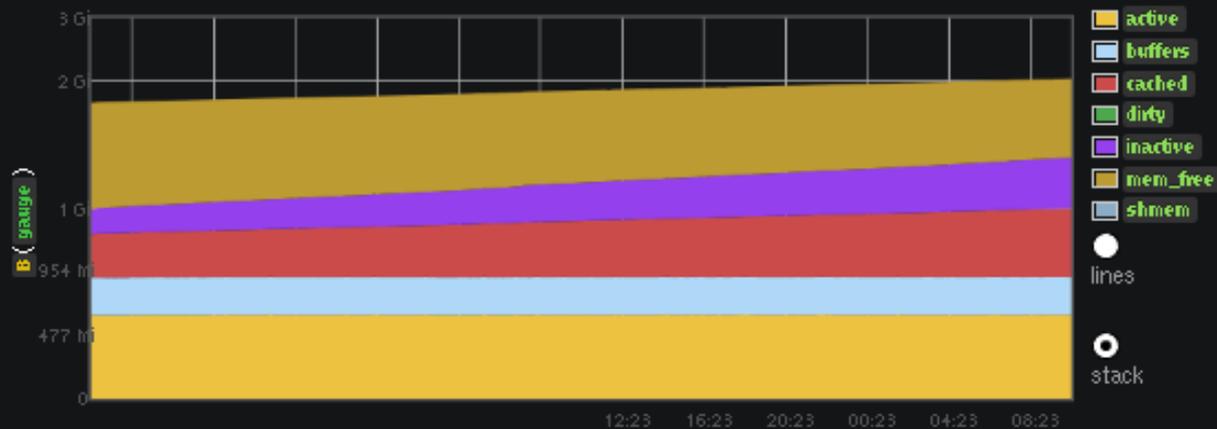

`cpu sum by core server=dfvimeostatsd1 avg over 10M from -2days`

`sum cpu_usage dfvimeostatsd1 cpu`

`mem unit=B !total !vmalloc group by type:swap server=dfvimeostatsd1 avg over 10M f`

`system_memory dfvimeostatsd1 memory`

`system_memory dfvimeostatsd1 memory`

Catchall plugins

```
stats.dfvimeocliapp2.twitter.error
{
  "n1": "dfvimeocliapp2",
  "n2": "twitter",
  "n3": "error",
  "plugin": "catchall_statsd",
  "source": "statsd",
  "target_type": "rate",
  "unit": "unknown/s"
}
```

Equivalence

servers.host.cpu.total.iowait → “core” : “_sum_”

servers.host.cpu.<core-number>.iowait

servers.host.loadavg.15
