# The problem with lone wolves

# The value of soft skills

# Software engineering is about people

# Needed Skills

**Dan Abramov (on a vacation)**

@dan\_abramov

We often debate the importance of more technical vs more human skills for “senior” technical roles. I think juxtaposing them against each other creates a strange dynamic where you’re supposed to pick a side. But both are kinda important and relevant?

♡ 910 2:59 AM - Jul 8, 2019

Over time, I've learned that the biggest source of failure is people and teams.

A lack of communication and coordination can cause serious problems.

— Laurie Barth (@laurieontech),  
“How Architecture Improved My Coding Skills”

The background of the slide is a close-up photograph of parched, cracked earth in shades of brown and tan. The cracks are irregular and form a complex, web-like pattern across the entire surface.

# Why don't we focus on our soft skills?

**Because  
they're hard.**

**They're hard in  
different ways for  
different people.**

## What Should We Remember?

## Need To Act Fast

## Not Enough Meaning

**Detritivore Biome means DOMAIN OF THE WORMS**

@noahsussman

The best engineers are not only good at listening but they are good at explaining as well.

If you have been overwhelmed and intimidated by a senior engineer please consider the Dunning-Kruger effect. It's likely that person knows less than they think they do. A lot less.

6:23 PM · Sep 8, 2019 · [Twitter Web App](#)

"Failure is an  
opportunity to grow"

## GROWTH MINDSET

"I can learn to do anything I want"

"Challenges help me to grow"

"My effort and attitude  
determine my abilities"

"Feedback is constructive"

"I am inspired by the success of others"

"I like to try  
new things"

"Failure is the  
limit of my abilities"

## FIXED MINDSET

"I'm either good at it or I'm not"

"My abilities are unchanging"

"I don't like  
to be challenged"

"I can either do it,  
or I can't"

"My potential is predetermined"

"When I'm frustrated,  
I give up"

"Feedback and criticism  
are personal"

"I stick to what I know"

**“Empathy is  
much harder  
than we think.  
To build empathy,  
we need to  
slow down.”**

— *“The Empathy Delusion”,  
Tenzer & Murray, 2019*

# Four attributes of empathy

Perspective taking

Non-Judgemental

Recognizing emotions

Communicate understanding

# When responding, avoid...

- Changing the subject
- Looking for silver linings
- Jumping straight to problem solving mode
- Talking about your experiences in a detractive way

# Not sure what to say? How about...

- Acknowledging their feelings
- Thanking them for letting you know
- Asking...
  - what they're feeling
  - what they need

LEGION

# Practice and Practices

**Mary Robinette Kowal** 

@MaryRobinette

Me, talking a writer down from imposter syndrome: How long have you been writing?

Them: Three years.

Me: And how old are you?

Them: 28.

Me: Okay. So you're a level 28 human and a level 3 writer. How good were you as a level 3 human?

Them: Ooooooooooh.

▼ Introduction

# Practices

(which you can practice)

**Pay Attention**

**Listen**

**Ask Questions**

# Types of listening

- Passive - worse
  - Jump to solution early
  - Used by: task-oriented developers
- Active - better
  - Seeking to deeply understand
  - Used by: Product managers, UX researchers

# Top 5 tips to be a better human

- Seek first to understand
- Listen twice as much as you speak
- Be open to feedback
- Have a growth mindset
- Practice doesn't make perfect; practice makes better
