## Technical Details on the Recent Firefox Add-on Outage

By [Eric Rescorla](#)

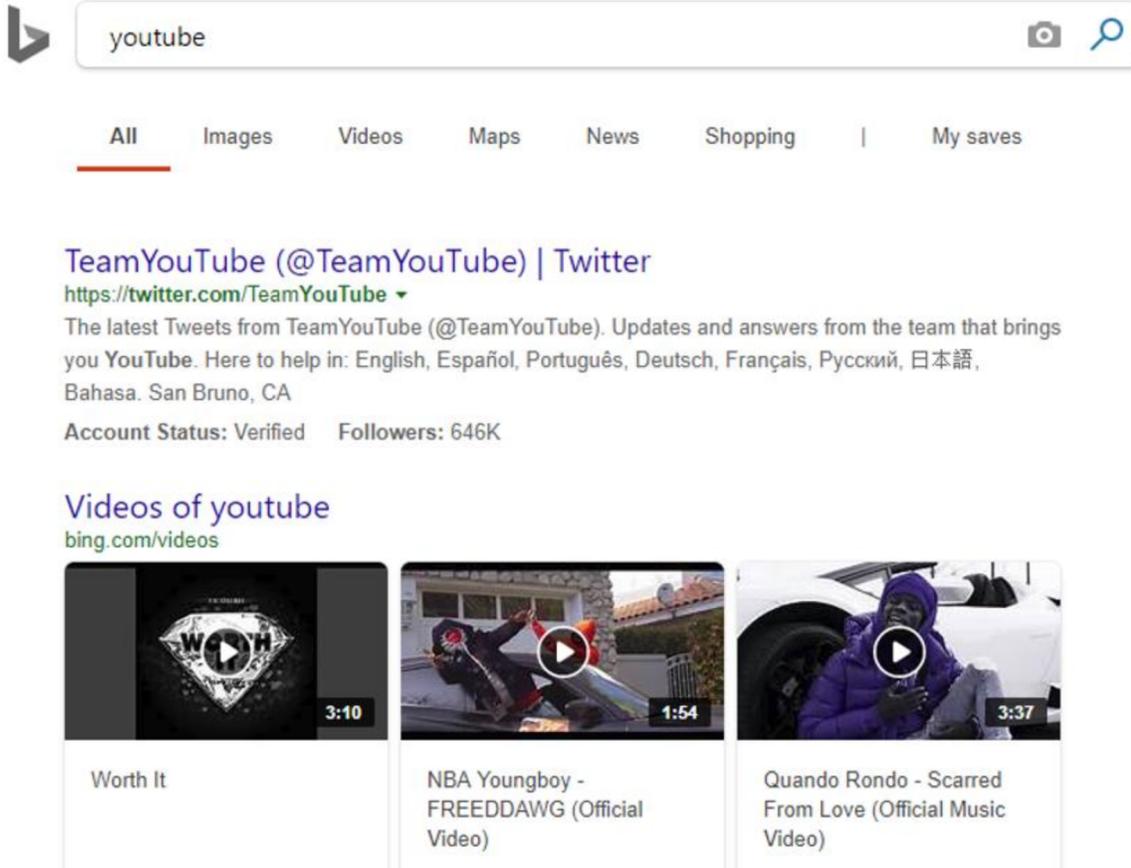

Posted on [May 9, 2019](#) in [Add-ons](#) and [Firefox](#) ♥ Share This

Recently, Firefox had an incident in which most add-ons stopped working. This was due to an error on our end: we let one of the certificates used to sign add-ons expire which had the effect of disabling the vast majority of add-ons. Now that we've fixed the problem for most users and most people's add-ons are restored, I wanted to walk through the details of what happened, why, and how we repaired it.

# Available, but is it useful?

A screenshot of a Bing search engine interface. The search bar contains the text "youtube". Below the search bar are navigation tabs: "All" (selected), "Images", "Videos", "Maps", "News", "Shopping", and "My saves". The search results section displays a Twitter profile for "TeamYouTube (@TeamYouTube)" with a link to their profile and a description of their content. Below this, there is a section titled "Videos of youtube" with three video thumbnails: "Worth It" (3:10), "NBA Youngboy - FREEDDAWG (Official Video)" (1:54), and "Quando Rondo - Scarred From Love (Official Music Video)" (3:37).

# Availability & Downtime

Availability %	Downtime per year	Downtime per month	Downtime per week	Downtime per day
<b>90% ("one nine")</b>	<b>36.5 days</b>	<b>72 hours</b>	<b>16.8 hours</b>	<b>2.4 hours</b>
95%	18.25 days	36 hours	8.4 hours	1.2 hours
97%	10.96 days	21.6 hours	5.04 hours	43.2 minutes
98%	7.30 days	14.4 hours	3.36 hours	28.8 minutes
<b>99% ("two nines")</b>	<b>3.65 days</b>	<b>7.20 hours</b>	<b>1.68 hours</b>	<b>14.4 minutes</b>
99.5%	1.83 days	3.60 hours	50.4 minutes	7.2 minutes
99.8%	17.52 hours	86.23 minutes	20.16 minutes	2.88 minutes
<b>99.9% ("three nines")</b>	<b>8.76 hours</b>	<b>43.8 minutes</b>	<b>10.1 minutes</b>	<b>1.44 minutes</b>
99.95%	4.38 hours	21.56 minutes	5.04 minutes	43.2 seconds
<b>99.99% ("four nines")</b>	<b>52.56 minutes</b>	<b>4.38 minutes</b>	<b>1.01 minutes</b>	<b>8.66 seconds</b>
99.995%	26.28 minutes	2.16 minutes	30.24 seconds	4.32 seconds
<b>99.999% ("five nines")</b>	<b>5.26 minutes</b>	<b>25.9 seconds</b>	<b>6.05 seconds</b>	<b>864.3 milliseconds</b>
<b>99.9999% ("six nines")</b>	<b>31.5 seconds</b>	<b>2.59 seconds</b>	<b>604.8 milliseconds</b>	<b>86.4 milliseconds</b>
<b>99.99999% ("seven nines")</b>	<b>3.15 seconds</b>	<b>262.97 milliseconds</b>	<b>60.48 milliseconds</b>	<b>8.64 milliseconds</b>
<b>99.999999% ("eight nines")</b>	<b>315.569 milliseconds</b>	<b>26.297 milliseconds</b>	<b>6.048 milliseconds</b>	<b>0.864 milliseconds</b>
<b>99.9999999% ("nine nines")</b>	<b>31.5569 milliseconds</b>	<b>2.6297 milliseconds</b>	<b>0.6048 milliseconds</b>	<b>0.0864 milliseconds</b>

Simplified formula:

$$Availability = \frac{(Total\ Requests - Failed\ Requests)}{Total\ Requests} \%$$

$$A = \frac{(T - F)}{T} \%$$

[https://en.wikipedia.org/wiki/High\\_availability](https://en.wikipedia.org/wiki/High_availability)

Used only weekdays  
During work hours  
99 or 99.9%?

[en.wikipedia.org/wiki/Parking\\_meter#/media/File:Multi-space\\_parking\\_meter.JPG](https://en.wikipedia.org/wiki/Parking_meter#/media/File:Multi-space_parking_meter.JPG)

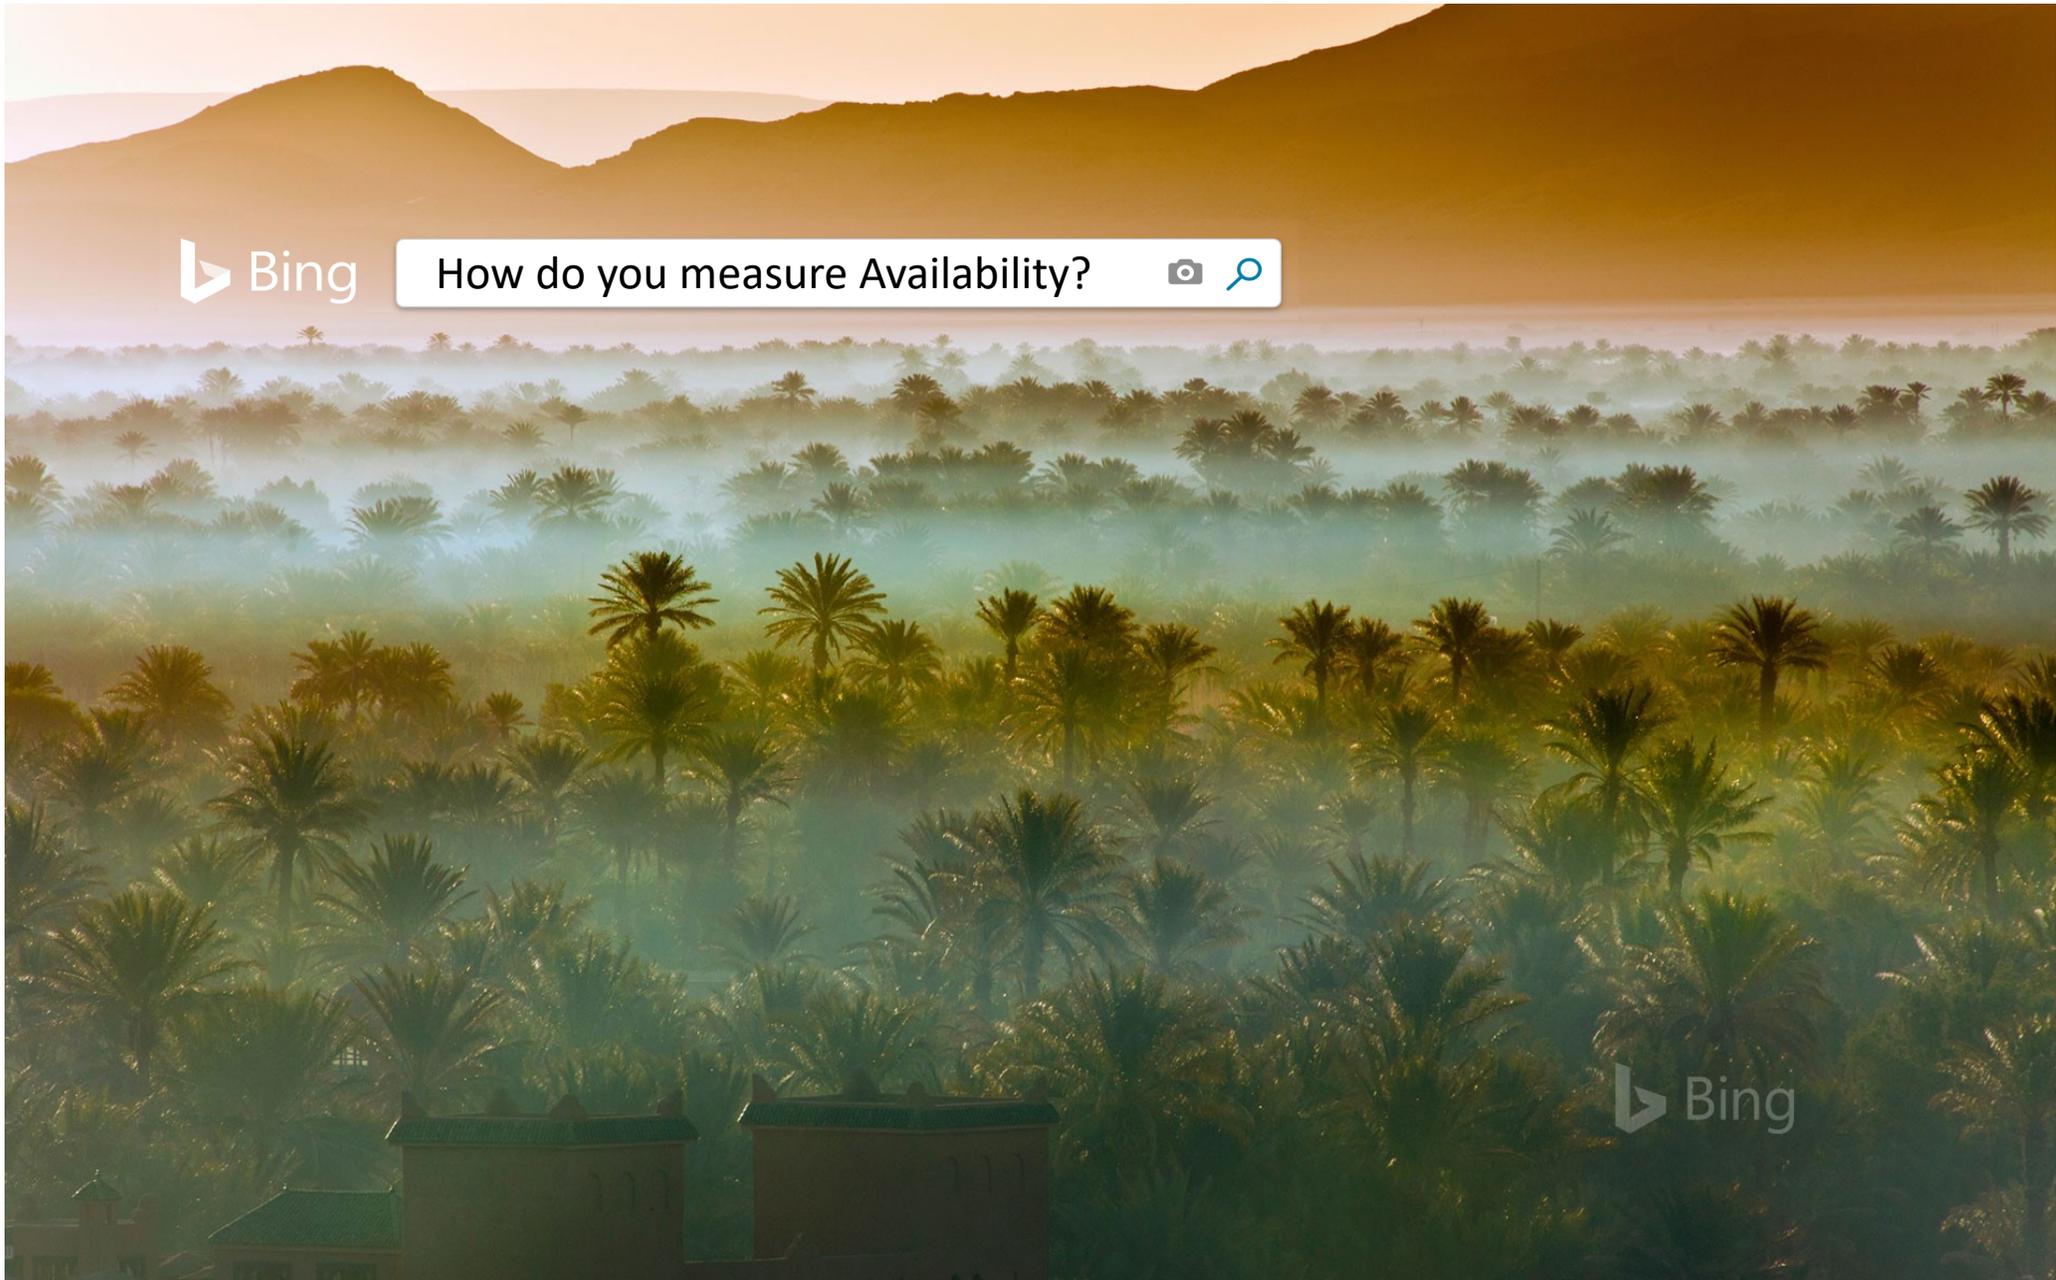

100,000 Flights a day  
99.9% → 100 failures/day  
99.999% → 1 failure/day  
99.99999% → 0.01 failure/day  
99.999999% → 3.65 failures/year

[www.faa.gov/air\\_traffic/by\\_the\\_numbers/media/Air\\_Traffic\\_by\\_the\\_Numbers\\_FY2018\\_Average\\_Daily\\_Flights\\_Handled\\_760x540\\_ca02.jpg](http://www.faa.gov/air_traffic/by_the_numbers/media/Air_Traffic_by_the_Numbers_FY2018_Average_Daily_Flights_Handled_760x540_ca02.jpg)

How do you measure Availability?

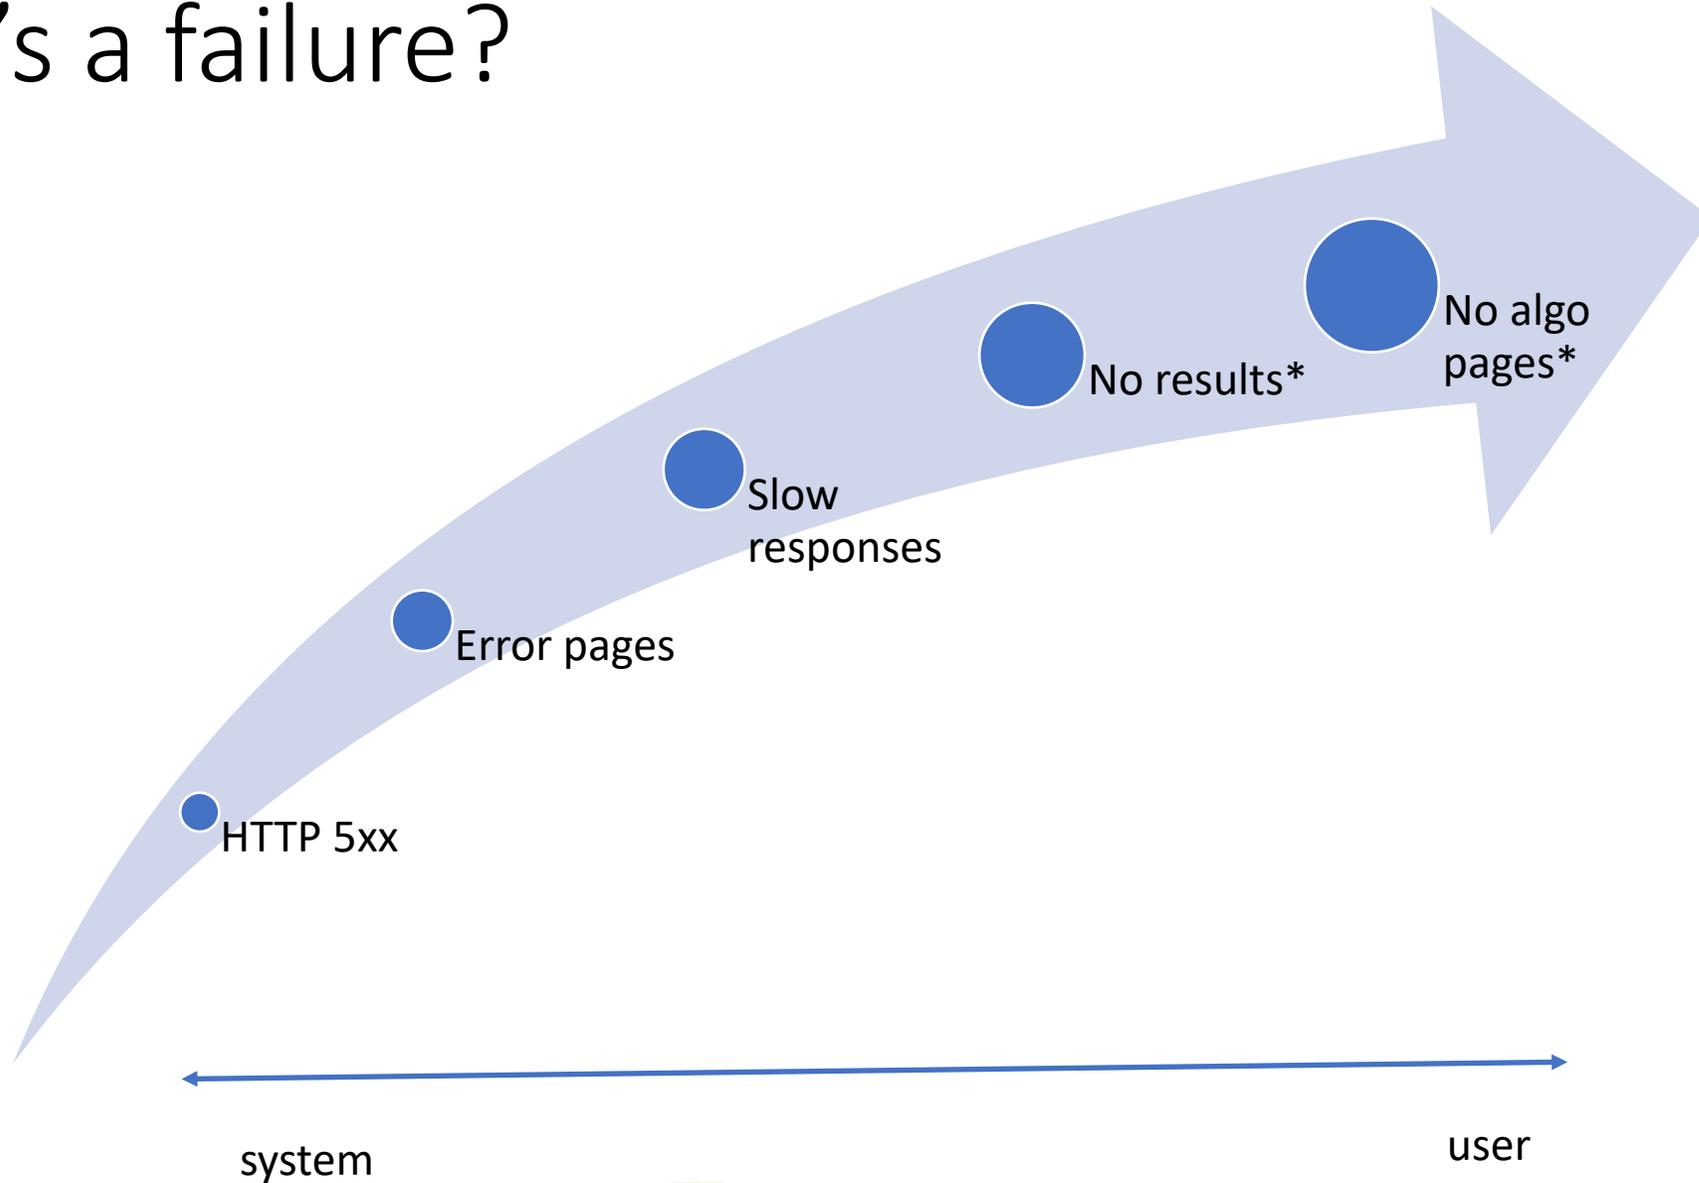

# Remember our formula?

$$\textit{Availability} = \frac{(\textit{Total Requests} - \textit{Failed Requests})}{\textit{Total Requests}} \%$$

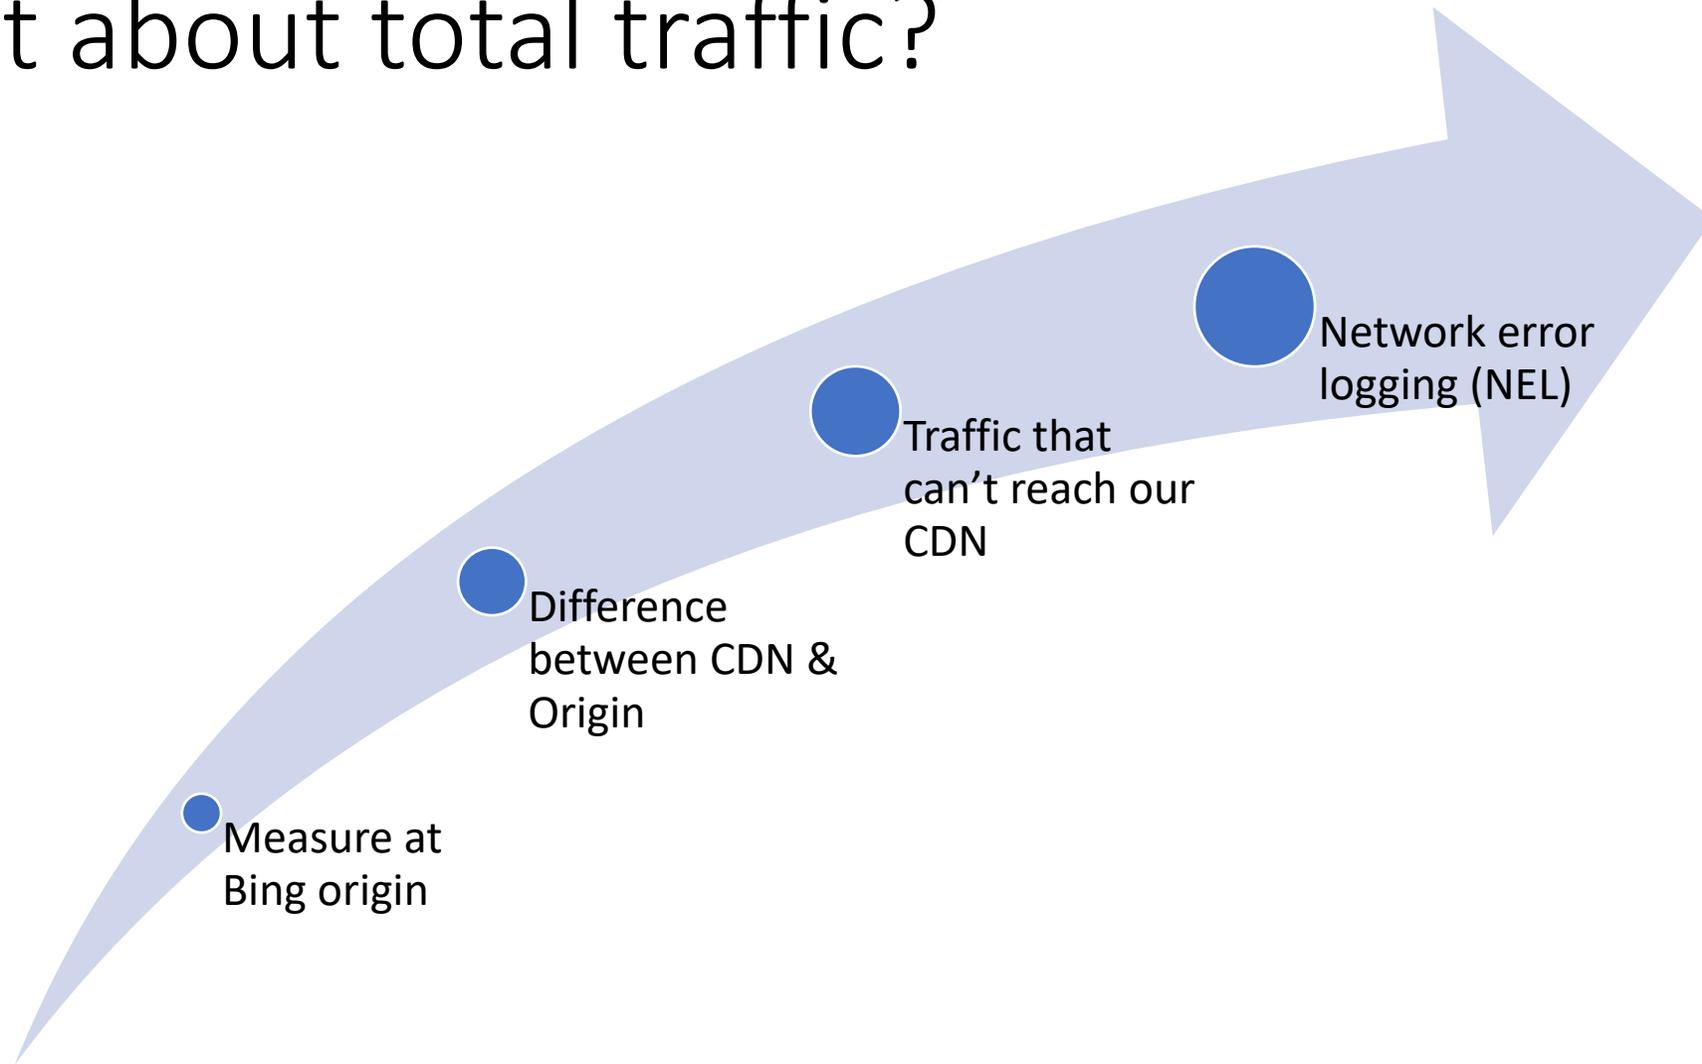

$$A = \frac{(T - F)}{T} \%$$

# What's a failure?

# What about total traffic?

# Things to consider...

- How many 9's?
  - Guided by user expectation & business needs
  - Think of diminishing returns
- Where and how you measure matters
- Synthetic monitoring can hide issues
- Client issues cannot be ignored
- Metrics need to evolve over time
- Outages/failures can affect metrics
- Reliable telemetry pipeline is critical

## Track 2

[Hide details](#) ▼

Room 331–332

### Understanding Business Metrics Can Make You a Better SRE

Friday, 2:00 pm–3:00 pm

Mohit Suley, Microsoft, and Kurt Andersen, LinkedIn

### Practical Instrumentation for Observability

Wednesday, 12:00 pm–12:30 pm

Gabe Krabbe, Google
